

2011 Census: Second address estimates for local authorities in England and Wales

Published 22 October 2012

These tables are part of the first release of second address estimates from the 2011 Census of Population for England and Wales.

The release provides information for England and Wales and constituent regions, London boroughs, districts and unitary authorities as at census day, 27 March 2011. The estimates included are the number of usual residents in England and Wales who reported having second addresses outside of the local authority or region in which they were usually resident.

It includes information about:

people who live at a second address within a local authority (or region) for at least 30 days per year, but who were usually resident in a different local authority (or region) in England and Wales; and

people who were usually resident in a local authority (or region), but who also live at a second address in a different local authority (or region) for at least 30 days per year.

The figures are provided in four tables with information for each local and unitary authority (in Tables 1 and 2) and for each region (in Tables 3 and 4), these tables are classified by sex, broad age group and type of second address.

A further four tables (Table 1a - 4a) provide similar information expressed as rates - these are defined as the number of people with a second address per 1,000 usual residents. These four tables are classified only by type of second address.

This release is in accordance with the provisions of section 4(1) of the Census Act 1920.

Confidentiality

ONS as the executive arm of the UK Statistics Authority has a legal obligation not to reveal information collected in confidence in the census about individual people and households. The confidentiality of all census results, including the counts in this release, is protected by a combination of a variety of disclosure protection measures.

Table 1

Number of residents with a second address in a local authority, who are usually resident outside of that local authority, by sex, broad age group and second address type, local authorities in England and Wales

Table 2

Number of usual residents in a local authority with a second address outside of that local authority, by sex, broad age group and second address type, local authorities in England and Wales

Table 3

Number of residents with a second address in a region, who are usually resident outside of that region, by sex, broad age group and second address type, local authorities in England and Wales

Table 4

Number of usual residents in a region with a second address outside of that region, by sex, broad age group and second address type, local authorities in England and Wales

Table 1a

People with a second address in a local authority, who are usually resident outside of that local authority, per 1,000 usual residents, by second address type, local authorities in England and Wales

Table 2a

Usual residents in a local authority with a second address outside of that local authority, per 1,000 usual residents, by second address type, local authorities in England and Wales

Table 3a

People with a second address in a region, who are usually resident outside of that region, per 1,000 usual residents, by second address type, local authorities in England and Wales

Table 4a

Usual residents in a region with a second address outside of that region, per 1,000 usual residents, by second address type, local authorities in England and Wales

1. A second address is an address at which a person stays for more than 30 days per year that is not a person's place of usual residence. This includes addresses that are in the UK and those outside of the UK. Typical second addresses include armed forces bases, addresses used by people working away from home, a student's home address, the address of another parent or guardian, or a holiday home. If a person with a second address was staying at that address on census night, they were classed as a visitor to that address, but counted as a usual resident at their home address.

2. For the 2011 Census, a usual resident of the UK is anyone who, on census day 2011, was in the UK and had stayed or intended to stay in the UK for a period of 12 months or more, or had a permanent UK address and was outside the UK and intended to be outside the UK for less than 12 months.

3. The age of a person is derived from their date of birth. It is their age in years on their last birthday up to and including census day 2011. Dates of birth that imply an age over 115 are treated as invalid and the person's age is imputed.

1. For the 2011 Census, a usual resident of the UK is anyone who, on census day 2011, was in the UK and had stayed or intended to stay in the UK for a period of 12 months or more, or had a permanent UK address and was outside the UK and intended to be outside the UK for less than 12 months.

2. A second address is an address at which a person stays for more than 30 days per year that is not a person's place of usual residence. This includes addresses that are in the UK and those outside of the UK. Typical second addresses include armed forces bases, addresses used by people working away from home, a student's home address, the address of another parent or guardian, or a holiday home. If a person with a second address was staying at that address on census night, they were classed as a visitor to that address, but counted as a usual resident at their home address.

3. The age of a person is derived from their date of birth. It is their age in years on their last birthday up to and including census day 2011. Dates of birth that imply an age over 115 are treated as invalid and the person's age is imputed.

Table 1a

2011 Census: People with a second address¹ in a Bromley, who are usually resident² outside of Bromley, per 1,000 usual residents, by second address type, local authorities in England and Wales

Usual residents elsewhere with a second address in Bromley	All second address types	8,868
People with a second address per 1,000 usual residents	All second address types	29
	Second address: Working	2
	Second address: Holiday	0
	Second address: Other	26
All usual residents		309,392

1. A second address is an address at which a person stays for more than 30 days per year that is not a person's place of usual residence. This includes addresses that are in the UK and those outside of the UK. Typical second addresses include armed forces bases, addresses used by people working away from home, a student's home address, the address of another parent or guardian, or a holiday home. If a person with a second address was staying at that address with census night, they were classed as a visitor to that address, but counted as a usual resident at their home address.

2. For the 2011 Census, a usual resident of the UK is anyone who, on census day 2011, was in the UK and had stayed or intended to stay in the UK for a period of 12 months or more, or had a permanent UK address and was outside the UK and intended to be outside the UK for less than 12 months.
