SITE NAME: Strategic Outer London Development Centre
 SITE LOCATION: Biggin Hill Airport
 SITE AREA: 1892790 sq.metres

FLUVIAL (RIVERS)

	% OF SITE	AREA (sq.m)
FLOOD ZONE 2	0	0
FLOOD ZONE 3A	0	0
FLOOD ZONE 3B	0	0

SUMMARY: The whole of the site is located within Flood Zone 1. In agreement with this, no recorded incidents of river flooding in this location are held by the Environment Agency.

SURFACE WATER

	% OF SITE	AREA (sq.m)	MAX ANTICIPATED DEPTH
HIGH RISK OF FLOODING:	0	0	0m
MEDIUM RISK OF FLOODING:	1	18928	1.2m
LOW RISK OF FLOODING:	4	75712	1.2m

SUMMARY: Parts of the site are shown to be at 'Low' and 'Medium' risk of flooding from surface water, with a maximum anticipated depth of approximately 1.2m. Mitigation measures will be required to reduce or manage the risk of surface water flooding to the proposed development; consideration should be given to the impact of those measures on the risk of flooding in the surrounding area.

The site is unlikely to be suitable for infiltration SuDS however is in the vicinity of a surface water sewer. The proposed development drainage should incorporate non-infiltration SuDS to attenuate the flow rate into this sewer.

GROUNDWATER

SUMMARY: The London Borough of Bromley does not hold any records of Groundwater flooding affecting the site. The British Geological Survey groundwater mapping however indicates that there is a low potential for groundwater flooding to occur at this location.

SEWERS

SUMMARY: There is a surface water sewer within the immediate vicinity (likely within the red line boundary) of the site, the residual risk of flooding to the site from a blockage of the sewer should be considered by a site specific Flood Risk Assessment (FRA).

ARTIFICIAL

SUMMARY: The site is not in an area indicated to be at risk of flooding as a result of a reservoir breach.

SITE SUMMARY

SITE ALLOCATION: The 'Strategic Outer London Development Centre' site has been allocated for Commercial use and is therefore classified as 'More Vulnerable' in accordance with Table 2 of the Planning Practice Guidance to the National Planning Policy Framework.

PLANNING IMPLICATION: The allocated site is not located within 500 metres of a Main River or Ordinary Watercourse. The site is entirely located within Flood Zone 1 and is therefore an appropriate location for all development types, including Commercial.

Legend

- Allocated Development Sites
- Borough Boundary
- Main River
- Culverted Main River
- Ordinary Watercourse
- Culverted Ordinary Watercourse
- Flood Zone 3 with a 70% allowance for climate change
- Risk of flooding from Rivers**
 - Flood Zone 3B
 - Flood Zone 3
 - Flood Zone 2
- Risk of flooding from Surface Water**
 - High risk of flooding (3.3% AEP)
 - Medium Risk of flooding (1% AEP)
 - Low risk of flooding (0.1% AEP)
- Risk of flooding from groundwater**
 - Limited potential for groundwater flooding to occur
 - Potential for groundwater flooding of property situated below ground level
 - Potential for groundwater flooding to occur at surface
- Suitability for infiltration SuDS**
 - Highly compatible for infiltration SuDS
 - Opportunities for bespoke infiltration SuDS
 - Probably compatible for infiltration SuDS
 - Very significant constraints are indicated
- Flood Risk from Reservoirs**
 - Reservoir flood extents
